

# Make a Kazoo!

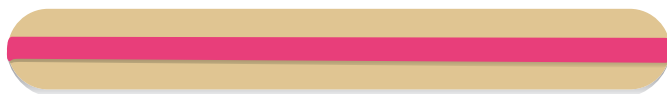

## You Will Need:

- 2 craft or popsicle sticks
- 1 thick rubber band
- 2 thin rubber bands
- 2 pieces of drinking straw (each about 2 inches long)

## What to Do:

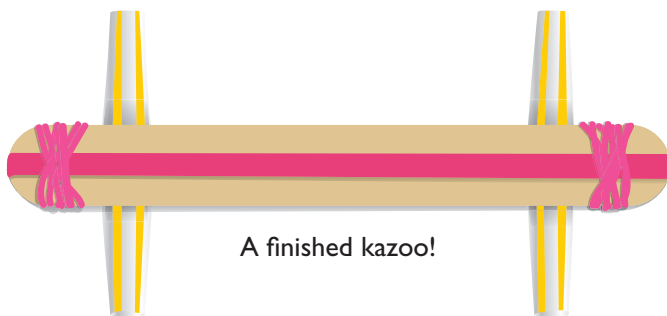

- 1 Stretch the thick rubber band along the length of one craft stick. Set it aside for now.
- 2 Put the pieces of straw on top of the other craft stick, about an inch from each end of the stick.
- 3 Lay the first craft stick (with the rubber band) on top of the straw pieces, so it makes a straw sandwich.
- 4 Have another person hold the kazoo together while you attach the thin rubber bands. On one end, wrap a thin rubber band around both craft sticks until it's tight. Do the same thing on the other end.
- 5 Gently press the sticks together and blow into your kazoo, between the straws.
- 6 Try sliding one piece of straw towards the middle. Notice what happens to the sound.
