

Restoration Project

Research a restoration project of your choosing. Use the NOAA Restoration Atlas or another restoration database to choose a restoration project to research. Following the research, you will present your findings to the class.

NOAA Habitat Conservation Restoration Center <http://www.habitat.noaa.gov/restoration/>

NOAA Restoration Atlas <http://www.habitat.noaa.gov/restoration/restorationatlas/index.html>

Included in the presentation should be answers to the following questions:

1. What caused damage to natural resources?

A.

2. What economic and social consequences resulted from this damage?

A.

3. What restoration activities were undertaken? Who undertook these activities?

A.

4. What ecological, economic, and social benefits have been achieved through restoration activities?

A.
