Translation German-English:

“Sterilization is liberation,
not punishment”

“What parents would wish
such a terrible fate for their
children?”

“Who would want to be
guilty of this?”

“Feeble-minded women are almost invariably immoral, and if at large usually become carriers of venereal disease or give birth to children who are as defective as themselves. The feeble-minded woman who marries is twice as prolific as the normal woman.”

W.E. Fernald (1912), from address
“The Burden Of Feeble-Mindedness”

Source: Boston Medical & Surgical Journal 166(25):911-915

“There is no class of persons in our whole population who, unit for unit, are so dangerous or so expensive to the state; this excepts no class, not even the violently insane. These girls are much more dangerous and expensive than the ordinary insane or the ordinary feeble-minded or the ordinary male criminal.

Why is this? They are dangerous because, being irresponsible wholly or in part, they become the prey of the lower class of vile men and are the most fertile source for the spread of all forms of venereal disease. They have not the sense nor the understanding to avoid disease nor any care as to its spread.

They are most expensive to the state because they are the most fruitful source of disease and mentally-defective children who are apt to become state charges.”

W.N. Bullard (1908), from article “The High-Grade Mental Defectives”

Source: Boston Medical & Surgical Journal 159:240-242

Quotes from the Supreme Court ruling *Buck v. Bell*, allowing forced sterilization by the government

"Carrie Buck is a feeble-minded white woman who was committed to the State Colony..."

"She is the daughter of a feeble-minded mother in the same institution, and the mother of an illegitimate feeble-minded child."

"The judgment finds the facts that have been recited and that Carrie Buck

is the probable potential parent of socially inadequate offspring, likewise afflicted, that she may be sexually sterilized without detriment to her general health and that her welfare and that of society will be promoted by her sterilization,

and thereupon makes the order."

"We have seen more than once that the public welfare may call upon the best citizens for their lives. It would be strange if it could not call upon those who already sap the strength of the State for these lesser sacrifices, often not felt to be such by those concerned, in order to prevent our being swamped with incompetence. It is better for all the world, if instead of waiting to execute degenerate offspring for crime, or to let them starve for their imbecility, society can prevent those who are manifestly unfit from continuing their kind. The principle that sustains compulsory vaccination is broad enough to cover cutting the Fallopian tubes."

"Three generations of imbeciles are enough."

Oliver Wendell Holmes, 1927

Buck v. Bell, 274 US 200 - Supreme Court 1927

STATE CRITERIA FOR LEGAL EUGENICAL STERILIZATION

STATE	TYPE OF PATIENT
Alabama	"Feebleminded."
Arizona	"Inmates of Hospital for Insane."
California	"Feebleminded, habitual criminals, insane, idiots, mental defectives."
Connecticut	"Feebleminded, insane, idiots, imbeciles and those with inherited tendency to crime."
Delaware	"Mentally defectives, insane, feebleminded or epileptic persons."
Idaho	"Feebleminded, insane, epileptics, habitual criminals, morally degenerate persons."
Indiana	"Hereditary insane, feebleminded or epileptic."
Iowa	"Feebleminded, insane, syphilitic, habitual criminals, morally degenerate persons."
Kansas	"Feebleminded, insane, habitual criminals."
Maine	"Feebleminded."
Michigan	"Mentally defectives, insane."
Minnesota	"Feebleminded, insane."
Mississippi	"Persons with hereditary form of insanity, feeblemindedness, idiocy, epilepsy."
Montana	"Feebleminded, insane, epileptic."
Nebraska	"Insane and feebleminded."
New Hampshire	"Feeblemindedness or certain forms of other mental diseases."
North Carolina	"Mentally defective persons."
North Dakota	"Feebleminded, insane, epileptic, habitual criminals, moral degenerates and sexual perverts."
Oklahoma	"Habitual criminals, hereditary feebleminded, insane, idiots, imbeciles, epileptics."
Oregon	"Feebleminded, insane, epileptic, habitual criminals, moral degenerates and sexual perverts."
South Carolina	"Hereditary form of insanity, idiocy, imbecility, feeblemindedness or epilepsy."
South Dakota	"Feebleminded."
Utah	"Habitual criminals, insane, idiots, imbeciles, feebleminded, or epileptics."
Vermont	"Prevent procreation of idiots, imbeciles, feebleminded or insane persons."
Virginia	"Hereditary insanity, idiocy, imbecility, feeblemindedness or epilepsy."
Washington	"Feebleminded, insane, epileptic, habitual criminals, moral degenerates and sexual perverts."
West Virginia	"Insanity, imbecility, epilepsy, idiocy, feeblemindedness."
Wisconsin	"Insane, feebleminded, epileptic and criminal persons."

MARCH-APRIL, 1936

EUGENICAL NEWS

CURRENT RECORD OF HUMAN GENETICS AND RACE HYGIENE

THE GERMAN RACIAL POLICY.

DR. C. G. CAMPBELL,
Honorary President, Eugenics Research
Association.

It is unfortunate that the anti-Nazi propaganda with which all countries have been flooded has gone far to obscure the correct understanding and the great importance of the German racial policy. The German nation has adopted a policy of biological improvement in its racial quality as its major national objective, to which all other objectives are regarded as subsidiary. This national policy seeks to attain the greater purity of racial stocks by selective endogamous mating and breeding, with a clear conception and conviction as to its beneficial effects upon its racial quality and its culture; the increased proportionate reproduction of the more competent eugenic stocks; and the proportionate decrease of the incompetent and undesirable dysgenic stocks. These objectives do not stop at perfunctory professions, but the most thorough and complete measures have been adopted to secure their maximum realization.

This policy is not the creation of political opportunists designed to flatter national vanity or to engender racial antagonisms, but it is the integration of the well-considered conclusions of its anthropologists, its biologists, and its sociologists, the latter of whom, in contradis-

inction to many in other countries, take full cognizance of the biological basis of collective life. No earnest eugenicist can fail to give approbation to such a national policy. Indeed it goes to realize the hopes that eugenicists have entertained for many years, but have despaired of ever seeing adopted in the present generation.

As one of the means of increasing the factual knowledge upon which this policy needs to be based, the Herculean task has been undertaken of recording the sixty odd million pedigrees of the entire German nation, and over 600,000 of such pedigrees have already been so taken, verified, and filed by a most admirable and perfect system. These pedigrees not only take account of the propositus but of his parents, grandparents, and near kin, and they record sufficient data to indicate the racial, physical, and mental status of every individual. It is obvious that such a stocktaking of what is to be considered as a nation's primary and most valuable asset is of itself of incomparable value. It will not only enable the nation to evaluate this asset from year to year and to note the progress of its measures for racial improvement, but it will be invaluable as a guide both in attaining racial purity and in breeding out undesirable racial traits. Moreover the analyses and correlations that can be made of this great mass of human data will inevitably lead to findings of the

Excerpts from the New York State Patients' Bill of Rights:

"As a patient in a hospital in New York State, you have the right, consistent with law, to:"

"(2) Receive treatment without discrimination as to race, color, religion, sex, national origin, disability, sexual orientation, age or source of payment."

"(8) Receive complete information about your diagnosis, treatment and prognosis.

(9) Receive all the information that you need to give informed consent for any proposed procedure or treatment. This information shall include the possible risks and benefits of the procedure or treatment."

"(12) Refuse to take part in research. In deciding whether or not to participate, you have the right to a full explanation."

"(14) Participate in all decisions about your treatment and discharge from the hospital."
